Training and Credit Status

Workforce development available now

The current workforce bank contains 21 direct-care staff courses. The separate application draft contains 16 proposed administrator courses: 01, 15, 16, 18, 19, 20, 28, 31 and S01–S08. The eight S courses remain the supervisor curriculum subset.

No administrator CE credit is currently offered

Application preparation is not approval. Neither vendor approval, course approval nor submission is represented as verified. Future administrator credit requires current written vendor and individual course approval. Vendor approval alone does not approve every course. No credit is promised for earlier workforce sessions.

Instructional time and completion

Every current STRTP course is planned for 60 instructional and 70 elapsed minutes. The staff catalog totals 21 instructional hours; the proposed administrator catalog totals 16, including eight supervisor hours. These are catalog totals, not package inclusions. Verified instruction, successful knowledge and applied assessment, and necessary remediation are required for completion.

Agency responsibility and professional boundaries

The agency determines whether the selected course, trainer qualifications and completion evidence fit its training plan. RWI supplies workforce-development instruction and technical assistance, not therapy, legal advice, licensing decisions, clinical supervision or physical-intervention certification. Regulatory compliance and organizational outcomes are not guaranteed.

Separate audience pathways

FFA services are for agency employees and leaders only. FFA and broader child-welfare work require role-specific adaptation and a written scope; STRTP requirements and catalog hours are not automatically transferable.
